### RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

JUNE 30, 2005 (expressed in thousands)

Net change in fund balances - total governmental funds

\$ 412,175

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlay as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period. (Note 5)

Capital outlay	399,491
Depreciation expense	(118,720)
Excess of capital outlay over depreciation expense	

In the statement of activities, only the gain or loss on the sale of capital assets is reported. However, in the governmental funds, the proceeds from the sale increase financial resources. Thus, the change in net assets differs from the change in fund balance by the cost of the capital assets sold.

(4,204)

280,771

Donations of capital assets or transfers of capital assets to other funds affects net assets in the statement of activities, but these transactions do not appear in the governmental funds because they are not financial resources.

(529)

Inventories of governmental funds are recorded as expenditures when purchased. However, in the statement of activities, inventories are expensed when consumed.

(1,029)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.

37,549

Internal service funds are used by management to charge the costs of certain activities, such as insurance and central computer services, to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.

21,640

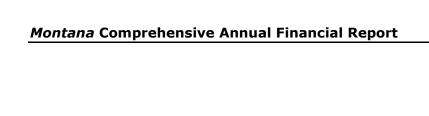

(115,490)

The incurrence of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. The details of these differences is as follows:

Bonds issued	(135,380)
Refunding bonds issued	(30,070)
Bond premium	(8,106)
Payment to refunding bond escrow agent	31,018
Capital lease financing	(517)
Principal retirement	27,203
Issuance costs deferral	947
Bond issuance costs amortization	(194)
Bond refunding loss amortization	(693)
Bond discount amortization	(4)
Bond premium amortization	306
Total long-term debt proceeds/repayment	

Some expenditures reported in the statement of activities do not require the use of current financial resources, and therefore are not reported as expenditures in the governmental funds. The details of these differences is as follows:

Accrued interest	(234)		
Compensated absences	1,378		
Early retirement benefits	161		
Arbitrage rebate tax	25		
Other liabilities	10,250		
Total additional expenditures		_	11,580
Change in net assets of governmental activities		\$	642,463
